

NomoLine® with Luer Sampling Lines

Cannulas and Airway Adapter Sets for Effective Capnography and Gas Monitoring

Luer connector allows for compatibility with water traps used with many common monitors in numerous care areas

Uniquely designed sampling line allows use during low-flow and small sample-size applications

> Airway Adapter Sets with low dead space allow for faster rise time and an unaffected waveform

Star-shaped lumen O₂ delivery tubing allows continuous, accurate O₂ supply even if kinked

Ergonomically designed cannulas for patient comfort

> Lightweight, soft cannulas with curved design fit the contours of the face to minimise pressure

Split-flow cannula design reduces gas mixing, facilitating accurate EtCO₂ measurements

> Cannula design delivers O₂ to the patient directly through the nasal prong

NomLine with Luer Products

Large, diverse product line allows use across all patient populations

- > For intubated patients, airway adapter sets with low dead space, allowing for fast rise time
- > For non-intubated patients, cannulas designed to facilitate EtCO₂ measurement in a variety of clinical care settings

NomLine with Luer Specifications

Length Options	2 m and 3 m
Tubing Inner Diameter	1 mm
Supplementary Oxygen Delivery	Up to 5 lpm
Airway Adapter Dead Space	
Adult/Paediatric	≤ 6 ml
Material	Not made with natural rubber latex

For professional use. See instructions for use for full prescribing information, including indications, contraindications, warnings, and precautions.
